

OrientalCay Fleet Overview

The OrientalCay fleet consists of aircraft produced by the Boeing Company, all of which are highly respected and world renowned. At this time the average fleet age for OrientalCay is just under 14 years! This means that most of our aircraft are fairly new, acquired shortly after the original delivery date, none of our aircraft are presently owned, all of which are leased.

Our smallest aircraft, the Boeing 737-700, is an efficient and reliable aircraft, capable of flying 3440 nautical miles. We presently have two Boeing 737's active in our fleet, both of which are based out of our main hub of operations- Hong Kong.

Our second definitive aircraft is the Boeing 757-200, presently OrientalCay is in possession of two of these aircraft. With a range of 4100 nautical miles, and room for 234 passengers at max capacity; this efficient, high-technology aircraft delivers excellent comfort for all passengers.

The third model of aircraft in OrientalCay's fleet and our Flagship, the Boeing 747-400, with its 7260nm range, is perfect for our long range flights, such as Hong Kong to London, or Hong Kong to the New York. All of our aircraft are fitted with comfortable leather seats in a Two Class Configuration excluding the Boeing 757. Each of them are refurbished just for OrientalCay, delivering PTV's in both WorldElite and WorldPremiere.

Fleet Overview:

Aircraft Type:	Aircraft Reg:	Production Date:	Delivery Date:	Christening:
B73G	B-HAY	08/12/2002	07/18/2011	"Singapore"
